

Low Voltage Switchgear

Disconnect Switches

Innovation. Technology. Quality.

Switchgear from Sälzer: Solutions for the future!

Since 1956 Sälzer has specialised in the development, manufacture and sale of low voltage switchgear.

The large selection of types, switching programmes and mounting forms mean that practical reliable solutions can be achieved quickly. Whatever the switch, all individual parts are optimally co-ordinated, easy to assemble and combine.

Whether in switching and automation systems, mechanical engineering and construction, in the heating, climatic and ventilation industry, environmental technology or other areas: Sälzer switches provide safety!

Product support, training and service as well as a Certified Quality Management to DIN EN ISO 9001 are an essential part of our daily work. Our switches comply with national and international standards (IEC / cUL) and are suitable for world-wide application.

Special requirements?

Call us, we'll help you find an individual solution for your switching needs.

Our Project Engineers are here to understand the special requirements of your project and assist to develop a solution as a partner.

Should your requirements not be covered by our extensive standard product range we have our own Design and Development Department for special switches in order to flexibly, promptly and cost effectively meet your individual requirements.

Disconnect Switches

Safe switching and disconnecting

SMD – Sälzer Modular Design

Faster delivery by SMD!

The SMD (Sälzer Modular Design) is based on a modular product idea so that very high flexibility in product options is possible.

SMD modules are individually prefabricated and tested complete modules. By combining these basic elements, different switch configurations can be realised within short time spans. The switches required by you, the customer, are available for despatch following the assembly of the basic switch module to the mounting form and operator modules (SMD Service).

Within 24 hours, the solution matched to your requirements is ready for despatch – worldwide.

Info

New product line B200 – Types B240, B250 and B263

The new product line B200, is a solution for the increasing demands in many areas of connection technology.

With new robust and increased capacity (25 mm²), and finger protected (IP20), box terminals complete with self-retaining screws. Alternatively the existing, well established, H263 with 16 mm² terminal capacity will remain available until further notice.

8-pole ON-OFF Switch

3-pole ON-OFF Switch (cross-sectional)

Within the product line B200 three types are currently available:

- **B240** = 40A operational current to AC-21A, 15 kW operational power to AC-23A with 380-400 V
- **B250** = 50A operational current to AC-21A, 18.5 kW operational power to AC-23A with 380-400 V
- **B263** = 63A operational current to AC-21A, 22 kW operational power to AC-23A with 380-400 V.

As well as both types being compactly designed and of identical mounting size, both provide additional safety by forced opening and positive closing of the contacts.

All mounting form modules and additional accessories for front and base mounting of the mounting size 200 are usable and are combinable with neutral contact module, auxiliary contact modules and N- and PE-terminals.

⇒ Further information on page 12.

Enclosed Switches with insulated enclosure for EMV/EMC application

Connection system for uninterrupted connection of shielded cables

In recent years, the EMV/EMC regulations have gained increasing importance. Sälzer Electric has developed an insulated enclosure complete with a connection system for the uninterrupted connection of shielded/screened cables and provides shielding of the entire system from electro-magnetic interference. This specific product is listed as the Sälzer EMV/EMC enclosure.

The insulated enclosure (175 × 115 × 100 mm H × W × D) is manufactured of polycarbonate with cover interlock in the ON position. In the enclosure is a shielding connection system that accepts the connection of four shielded/screened cables.

The following Disconnect Switches are available in this enclosure:

3-pole Main/Emergency-Off Switch with insulated enclosure for EMV/EMC application

- Types **H216, H220, H226** and **H233** as
 - ⇒ 2-, 3- and 4-pole Main/Emergency-Off Switches or Main Switches
 - ⇒ 6-pole Main/Emergency-Off Switches or Main Switches
 - ⇒ 3- and 4-pole ON-OFF Switches
 - ⇒ 6-pole ON-OFF Switches
 - ⇒ 2- and 3-pole Changeover Switches
- Types **B240, B250** and **B263** as
 - ⇒ 2-, 3- and 4-pole Main/Emergency-Off Switches or Main Switches
 - ⇒ 3- and 4-pole ON-OFF Switches.

⇒ Further information on pages 37, 71, 103 and 126.

Disconnect Switches

- 1 Operator module
- 2 Mounting form module
- 3 Switch module
- 4 Additional module
- 5 Terminal cover

Disconnect Switches

Safe Switching and Disconnecting

Disconnect Switches from Sälzer Electric are hand-operated switchgear for main circuits with 90° switching angle and are offered as ON-OFF Switches (2, 3, 4, 6 and 8 pole) or as Changeover Switches with centre OFF (2, 3 and 4 pole).

Design and Function

- 90° switching angle
- forced open contacts
- finger protected (degree of protection up to IP20)
- short-circuit rating
- fulfills the load break requirements up to 690 V and 1000 V
- terminal screws in open position

Applications

Disconnect Switches offer ideal features for their use as:

- ON-OFF Switches
- Main Switches
- Emergency-Off Switches
- Maintenance Switches
- Safety Switches
- Distribution Switches
- Motor Switches

Conformity

Our products are designed, manufactured and tested according to the following standards:

- IEC 60947
- IEC 60204-1
- EN 60947
- EN 60204-1
- cUL 508

Disconnect Switches

Product overview

Mounting options:

Front Mounting

- Four hole mounting
- Single hole mounting

Base Mounting

- Snap-on mounting
- Four hole mounting

Enclosed Switches

- Insulated enclosure
- Mild steel enclosure
- Stainless steel enclosure

With a broad range of mounting and operator options, Sälzer Electric can provide economical, versatile and reliable solutions!

All products are available
in different versions

Setup of order code number:

The 16 digit order code number for complete switches consists of the three ident numbers for type, switching programme and mounting form:

- the **type** specifies the physical size and power rating of the switch
- the **switching programme** specifies the switching arrangement and the switching angle
- the **mounting form** specifies the mounting, types of handle and optional extras.

In addition to the order code number, each complete switch is assigned a machine readable 13 digit EAN Code.

Ordering example:

Order code number: H216 - 71300 - 214V1

- **Type H216**
for a switch of the product line H200, operational current $I_e = 20 \text{ A}$
- **Switching programme 71300**
for a 3 pole Changeover Switch without auxiliary contacts
- **Mounting form 214V1**
for a front mounting switch with single hole mounting $\varnothing 22.5 \text{ mm}$ and padlockable V-handle (silver/black).

On the individual product pages you will find detailed all possible combinations for the Standard Switching Programmes, hence you will only require the order code number for the complete switch.

Additional switching programmes can be found from page 132 where the new order code number for the switching programme can be identified. Please note that the identification number of the switching programme must now be replaced by the new selection.

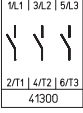

Disconnect Switches

Main/Emergency-Off Switches **Front mounting** Four hole mounting

Main/Emergency-Off Switches

- Front mounting switches with four hole mounting
- 3 up to 8 pole
- 20 A up to 315 A
- IP66 / IP55

Main/Emergency-Off Switches

- Base mounting switches with snap-on mounting
- Door interlock
- 3 up to 8 pole
- 20 A up to 125 A
- **IP66**
- with modular or metal shaft extension
- single or four hole front mounting

Base mounting switches with snap-on mounting and door interlock are offered with two different extensions:

1. Switches with **modular shaft extensions** can be extended with additional modules (modular shaft extensions see picture) which can be fixed to achieve different required mounting depths – dimension C. The modules are detailed on page 145.

AVC2/AVC4
Modular shaft extension

2. For switches with **metal shaft extension** the metal shaft is not included in the scope of delivery and has to be ordered separately. Data for mounting dimension C and for the different types of metal shafts can be found on page 146.

AVB8
Metal shaft extension for
four hole front mounting

AVA8
Metal shaft extension for
single hole front mounting

* terminal lugs included

Further switching programmes and corresponding dimensions for types K on request.

Main/Emergency-Off Switches

- Enclosed switches with insulated enclosure (polycarbonate)
- Cover interlock in ON position
- 3 up to 8 pole
- 20 A up to 315 A
- IP66

Main Switches

- Base mounting switches with snap-on mounting
- Door interlock
- 3 up to 8 pole
- 20 A up to 125 A
- **IP66**
- with modular or metal shaft extension
- single or four hole front mounting

Base mounting switches with snap-on mounting and door interlock are offered with two different extensions:

1. Switches with **modular shaft extensions** can be extended with additional modules (modular shaft extensions see picture) which can be fixed to achieve different required mounting depths – dimension C. The modules therefore are detailed on page 145.

AVC2/AVC4
Modular shaft extension

2. For switches with **metal shaft extension** the metal shaft is not included in the scope of delivery and has to be ordered separately. Data for mounting dimension C and for the different types of metal shafts can be found on page 146.

AVB8
Metal shaft extension for
four hole front mounting

AVA8
Metal shaft extension for
single hole front mounting

Disconnect Switches

ON-OFF Switches **Base mounting** Snap-on mounting with door interlock

ON-OFF Switches

- Base mounting switches with snap-on mounting
- Door interlock
- 3 up to 8 pole
- 20 A up to 125 A
- **IP66**
- with modular or metal shaft extension
- single or four hole front mounting

Base mounting switches with snap-on mounting and door interlock are offered with two different extensions:

1. Switches with **modular shaft extensions** can be extended with additional modules (modular shaft extensions see picture) which can be fixed to achieve different required mounting depths – dimension C. The modules are detailed on page 145.

AVC2/AVC4
Modular shaft extension

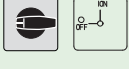

2. For switches with **metal shaft extension** the metal shaft is not included in the scope of delivery and has to be ordered separately. Data for mounting dimension C and for the different types of metal shafts can be found on page 146.

AVB8
Metal shaft extension for
four hole front mounting

AVA8
Metal shaft extension for
single hole front mounting

578M1	440	320	180	52	480	293

Blank gland plates

Mounting brackets are included.

ON-OFF Switches

- Enclosed switches with insulated enclosure (polycarbonate)
- EMV/EMC application, connection system for the uninterrupted connection of shielded/screened cables consisting of shroud and 4 shroud clamps \varnothing 12–16 mm
- Cover interlock in ON position
- 3 up to 6 pole
- 20 A up to 63 A
- IP66

Changeover Switches

- Base mounting switches with snap-on mounting
- Door interlock
- 3 up to 4 pole
- 20 A up to 125 A
- **IP66**
- with modular or metal shaft extension
- Single or four hole front mounting

Base mounting switches with snap-on mounting and door interlock are offered with two different extensions:

1. Switches with **modular shaft extensions** can be extended with additional modules (modular shaft extensions see picture) which can be fixed to achieve different required mounting depths – dimension C. The modules therefore are detailed on page 145.

AVC2/AVC4
Modular shaft extension

2. For switches with **metal shaft extension** the metal shaft is not included in the scope of delivery and has to be ordered separately. Data for mounting dimension C and for the different types of metal shafts can be found on page 146.

AVB8
Metal shaft extension for
four hole front mounting

AVA8
Metal shaft extension for
single hole front mounting

Changeover Switches Enclosed Switches – Insulated Enclosure for EMV/EMC application

Changeover Switches

- Enclosed switches with insulated enclosure (polycarbonate)
- EMV/EMC application, connection system for the uninterrupted connection of shielded/screened cables consisting of shroud and 4 shroud clamps \varnothing 12–16 mm
- Cover interlock in position 1 and 2
- 3 pole
- 20 A up to 40 A
- IP66

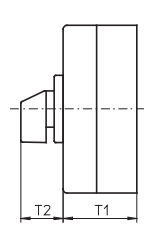

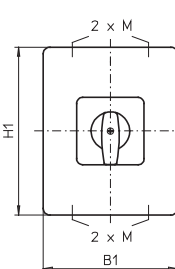

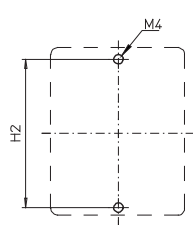

Switching programme	Rated data (IEC 60947)			Enclosure dimension (H x W x D) (mm)	M-handle silver/black

Changeover Switches Enclosed Switches – Stainless Steel Enclosure

Changeover Switches

- Enclosed switches with stainless steel enclosure (brushed)
- Cover interlock in position 1 and 2
- 3 up to 4 pole
- 20 A up to 125 A
- IP66

Terminal covers

TCA/TCC

TCB/TCD

Terminal covers can be used on front and base mountings. Incoming terminal covers are included with all Main Switches and Main/Emergency-Off Switches of the H400 product line, and don't have to be ordered separately.

The variety of available switching programmes requires different terminal covers. Please order the required quantities!

Utilisation Categories

Utilisation categories for Switches, Disconnectors, Switch-Disconnectors and Fuse-Combination Units according to IEC/EN 60947-3

Type of Current	Utilisation Category		Typical applications
	Frequent operation	Occasional operation	
AC	AC-15A	AC-15B	Controlling electromagnetic load
	AC-20A *	AC-20B *	Making and breaking without load
	AC-21A	AC-21B	Switching resistive loads including low overloads
	AC-22A	AC-22B	Switching mixed resistive and inductive loads, including low overloads
	AC-23A	AC-23B	Switching motors and other highly inductive loads
DC	DC-20A *	DC-20B *	Making and breaking without load
	DC-21A	DC-21B	Switching resistive loads including low overloads
	DC-22A	DC-22B	Switching mixed resistive and inductive loads, including low overloads (e. g. shunt motors)
	DC-23A	DC-23B	Switching highly inductive loads (e. g. series motors)

* The application of these utilisation categories isn't permitted in the USA.

Category AC-23 includes occasional switching of individual motors. The utilisation categories in the above table do not apply to an equipment normally used to start, accelerate and/or stop individual motors. The utilisation categories for such an equipment are dealt with the following table:

Type of Current	Utilisation Category	Typical applications
AC	AC-2	Slip-ring motors: starting, plugging ¹⁾ , switching off
	AC-3	Squirrel-cage motors: starting, switching off running motors
	AC-4	Squirrel-cage motors: starting, plugging ¹⁾ , inching ²⁾
DC	DC-3	Shunt motors: starting, plugging ¹⁾ , inching ²⁾ , dynamic breaking of d.c. motors
	DC-4	Series motors: starting, plugging ¹⁾ , inching ²⁾ , dynamic breaking of d.c. motors

¹⁾ Plugging is understood to mean stopping or reversing the motor rapidly by reversing motor primary connections while the motor is running.

²⁾ Inching (jogging) is understood to mean energizing a motor once or repeatedly for short periods to obtain small movements of the driven mechanism.

Note: The switching of rotor circuits, capacitors or tungsten filament/discharge lamps shall be subject to special agreements between manufacturer and user.

Disconnect Switches

Technical Information Rated currents

Rated currents of three-phase motors (approximate figures for squirrel-cage motors)

Motor rating			Motor full-load current			Fuse starting			Motor full-load current			Fuse starting

The rated motor currents are for standard 1500 r.p.m. motors with normal inner and outer surface cooling

Fuse: This table applies to "slow" or "gL"

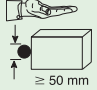

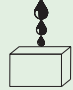

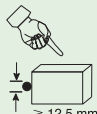

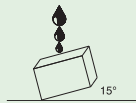

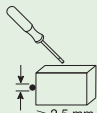

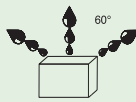

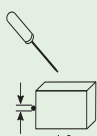

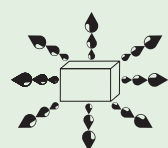

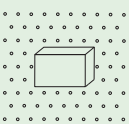

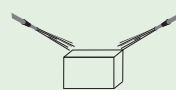

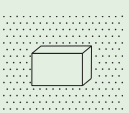

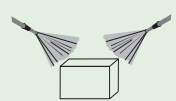

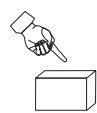

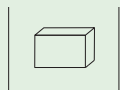

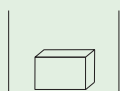

D.O.L. starting: Maximum starting current: 6 × rated current. Maximum starting time: 5 sec.

Y/Δ starting: Maximum starting current: 2 × rated current. Maximum starting time: 15 sec.

IP Codes

A coding system is defined by IEC/EN 60529 for the classification of degrees of protection provided by enclosures of electrical equipment against solid objects and water. This coding comprises the letters 'IP' followed by a two digit code as follows:

1 st digit	protection against solid objects and access to hazardous parts	2 nd digit	Protection against water
0	No protection.	0	No protection.
1	 No ingress by solid objects ≥ 50 mm dia nor access to hazardous parts with the back of the hand.	1	 Vertically falling drops of water shall have no harmful effect.
2	 No ingress by solid objects ≥ 12.5 mm dia nor access to hazardous parts with a finger.	2	 Vertically falling drops of water shall have no harmful effect when the enclosure is tilted at any angle up to 15° from vertical.
3	 No ingress by solid objects ≥ 2.5 mm dia nor access to hazardous parts with a tool.	3	 Water sprayed at up to 60° from the vertical shall have no harmful effect.
4	 No ingress by solid objects ≥ 1.0 mm dia nor access to hazardous parts with a wire.	4	 Water splashed from any direction shall have no harmful effect.
5	 Dust protected. Ingress of dust is not completely prevented, but there should be no harmful deposits. No access to hazardous parts with a wire.	5	 Jets of water projected from any direction shall have no harmful effect.
6	 Dust tight. No ingress of dust. No access to hazardous parts with a wire.	6	 Strong jets of water projected from any direction shall have no harmful effect.
1B	 Test finger penetration to a maximum of 80 mm must not contact hazardous parts.	7	 Temporary immersion in water shall not result in ingress of harmful quantities of water.
		8	 Continuous immersion in water shall not result in ingress of harmful quantities of water.

Conformity

Sälzer Electric Disconnect Switches are conform to the regulations of 'Directive 2014/35/EU on the harmonisation of the laws of the Member States relating to the making available on the market of electrical equipment designed for use within certain voltage limits', specified as Low Voltage Directive.

The conformity is proved by the by the complete compliance of the harmonized EN 60947-1, EN 60947-3, EN 60947-5-1, EN 60204-1.

Sälzer Electric products are developed, manufactured and tested according to these standards. The CE marking on all our products prove the conformity to the directives.

Disconnect Switches from Sälzer are approved according to UL 60947. The Disconnect Switches H216, H220, B240, B250, B263, H406, H408, H410 and H412 are suitable for use as a motor disconnect.
